CLINIQLANC AT A GLANCE

KNOWLEDGE

We specialized healthcare products and services to achieve operational efficiencies, improve quality of care, and deliver personalized experiences with our specialized healthcare services.

ACCURACY AND PRECISION

We strive to deliver comfortable, well-designed personal protective equipment (PPE) that offers your workers the most effective protection available.

COMMITMENT & RESPONSIBILITY

You can buy Cliniqblanc Safety PPE, confident in the knowledge that Cliniqblanc is working hard to provide products that your employees will feel good about wearing.

CLINIQLBLANC SOURCES AND CRAFTS ONLY EXTODINARY PRODUCTS

cliniqlblanc

CLINIQBLANC LUMINOUS CLEAN WIPES PRESATURATED IPA WIPES CASE AND SINGLE USE PACKAGES.

BENEFITS

- Reduced VOCs
- Minimized bulk liquid storage
- Safer to ship, store and use
- Consistency in application of solvent
- Ideal flash off time

CLX Clean Wipes, presaturated isopropyl alcohol wipes, 70% IPA/30% DI water, 9" x 11", non-woven polyester in resealable bag. Case of 18 Bags, 48Wipes per Bag.

For wet wiping of delicate, scratch-sensitive surfaces.

With high resistance to acids and many chemicals, these wipes are excellent for removing residues from surfaces and general wet wiping. Purity and cleanliness to support ISO 4 and ISO 5 environments and recommended for ISO 5-8 critical environments.

Delivery
7 - 30 Days*

CLEAR BY CLINIQBLANC™ IS DUAL ACTION DISINFECTING WIPES KILLING 99.9% GERMS & VIRUSES

Luminous Clear Disinfecting Wipes eliminate cold and flu viruses, helping to keep surfaces healthy year-round.

EPA registered hospital disinfectant cleaner, food surface sanitizer, mold killer, and heavy-duty odor eliminator. Safe around people and pets, Vital Oxide is has been rated by the EPA as a Category 4, which states - no exposure warnings required on label.

Luminous Clear Disinfecting Wipes can be used throughout your home, on surfaces such as:

Kitchen counters
Sinks, Toilet Seats and Bath Tubs
Doorknobs and Light Switches
Smartphones, Tablets and Game Consoles
Garbage cans
Refrigerator exteriors
Germs & Allergens

Clear Disinfecting Wipes eliminate the following bacteria, viruses, and allergens from hard, non-porous surfaces*:

Viruses

Herpes Simplex Virus Type 1
Human Coronavirus
Influenza A Virus
Respiratory Syncytial Virus
Bacteria

Streptococcus pyogenes (Strep)
Staphylococcus aureus (Staph)
Escherichia coli O157:H7 (E. coli)
Methicillin Resistant Staphylococcus aureus (MRSA)
Salmonella enterica (Salmonella)
Allergens

Dust mite debris
Pet dander
Pollen particles
Fungi

Aspergillus niger (mold & mildew).

Delivery 7 - 30 Days*

CLS OXIDE 5 GALLON PAIL - DISINFECTANT & LUMINOUS SANITIZER - EPA APPROVED/HOSPITAL GRADE.

Disinfectant, hospital disinfectant, all purpose disinfectant, sanitizer, disinfectant & sanitizer.

EPA registered hospital disinfectant cleaner, food surface sanitizer, mold killer, and heavy-duty odor eliminator. Safe around people and pets, Vital Oxide is has been rated by the EPA as a Category 4, which states - no exposure warnings required on label.

Effective on a broad-spectrum of virus, and bacteria, including “super bugs” like MRSA and H1N1, Vital Oxide breaks down to simple salt and produces no harmful by-products. Vital Oxide is NSF certified D2 (No Rinse Required) as a food contact surface sanitizer, and kills 99.999% of bacteria, including E. coli, Salmonella and Listeria in less than 60 seconds. Ready to use, no mixing required, just spray, wipe, or fog right from the bottle. Non-irritating to the skin, and non-corrosive to treated articles. Vital Oxide kills microbes by chemically altering certain amino acids that contain sulfur. The amino acids are important building blocks in the proteins that help to form cell walls. When these proteins are destroyed, the cell wall ruptures, and the organism dies. In the chemical reaction, Vital Oxide takes on an electron from the amino acid and reverts back to a chlorite ion. The amino acid gives up an electron and giving up an electron is what chemists call oxidation.

Delivery
7 - 30 Days*

DELIVERY 7 - 30 DAYS*

CLINIQLBLANC MASKS

Cliniqblanc face masks are manufactured on state-of-the-art machinery in approved factories. Our innovative designs and premium materials ensure that Cliniqblanc face masks provide reliable protection, as well as exceptional breathability and comfort, even for those with sensitive skin or who feel claustrophobic in ordinary masks.

SCIENCE IN MOTION

SURGICAL MASKS VS. N95 RESPIRATORS

There are two types of medical face masks: Procedure masks (a.k.a. surgical masks) and N95 masks (a.k.a. respirators). It is important to understand the differences between the two:

	Procedure/Surgical Mask	N95 Respirator
Face Seal Fit	Loose-fitting	Tight-fitting
Intended Use and Purpose	Fluid resistant, protects wearer against large droplets, splashes or sprays of bodily or other hazardous fluids and protects patients from wearer's respiratory emissions	Reduces wearer's exposure to particles including small particle aerosols and large droplets (only non-oil aerosols)
Filtration	Degree of protection is indicated by ASTM level	Provides wearer with a reliable level of respiratory protection by filtering out at least 95% of large and small airborne particles
Leakage	Leakage occurs around edges of mask when user inhales	When properly fitted, allows minimal leakage around edges when user inhales
Testing and Approval	Cleared by Food and Drug Administration (FDA)	Cleared by Food and Drug Administration (FDA) and evaluated, tested and approved by NIOSH as per 42 CFR Part 84 requirements
Fit Testing Requirement	No	No
User Seal Check Required	No	Yes. Every time it is put on.

CHOOSING THE RIGHT ASTM LEVEL

American Society of Testing and Materials Requirements

Medical masks should be selected based on the level of protection required for their intended use.

Bacterial filtration efficiency (BFE)	≥ 95%	≥ 98%	≥ 98%
Sub-micron particulate efficiency at 0.1 µm (PFE)	≥ 95%	≥ 98%	≥ 98%
Resistant to penetration by synthetic blood	@80 mm Hg	@120 mm Hg	@160 mm Hg
Differential pressure (ΔP)	< 5.0 mm H ₂ O/cm ²	< 6.0 mm H ₂ O/cm ²	< 6.0 mm H ₂ O/cm ²
Flame spread	Class 1	Class 1	Class 1
N95 respirators only: Solid Aerosol filter efficiency	≥ 95%	≥ 98%	≥ 98%

TYPES OF MASKES

Use Limitations: These respirators do not supply oxygen. Do not use when contaminant concentrations are: immediately dangerous to life and health; unknown; above the maximum use limitations for each respirator type. Do not use in atmospheres containing less than 19.5% oxygen. Do not abuse, modify or misuse any respirator. Do not use close fitting respirators (half facepiece or full facepiece) with beards or other facial hair that prevent direct contact between the face and the respirator sealing surface.

WARNING These respirators help protect against certain dusts, fumes, mists, gases and vapors but do not eliminate exposure to or the risk of contracting disease or infection. Misuse may result in sickness or death.

AILERON

N95 RESPIRATOR

CARDINAL

N95 SURGICAL RESPIRATOR

Premier particulate respirators for high heat and humid applications

Prevents large particles expelled by you, the wearer, from reaching the environment.

Aqueous facemask is fluid resistant.

Fits perfectly on most faces.

Premier particulate respirators for high heat and humid applications

Prevents large particles expelled by you, the wearer when you are ill, from reaching the environment.

To be used as a physical barrier to protect you from large droplets of blood or body fluids.

Bacterial filtration efficiency above 95%.

Aqueous facemask is fluid resistant.

Fits perfectly on most faces.

Premier particulate respirators for high heat and humid applications

Reduces your exposure to very small airborne particles or Containments.

May not protect against sprays and direct liquid splashes.

Minimum 95%** against particulate aerosols (of 0.3 micron in size) free of oil.

Aqueous facemask is fluid resistant.

Fits perfectly on most faces.

Premier particulate respirators for high heat and humid applications

It is a medical device.

Provides the protection of both a surgical mask and N95 respirator. To be used as a physical barrier from large droplets of blood or body fluids as well as very small particles.

Minimum 95%** against particulate aerosols (of 0.3 micron in size) free of oil.

Aqueous facemask is fluid resistant.

Fits perfectly on most faces.

HEALTH PARTICULATE RESPIRATOR & SURGICAL MASK

AILERON L3 P

HEALTH PARTICULATE RESPIRATOR & SURGICAL MASK

CARDINAL SL3V
HEALTH PARTICULATE
RESPIRATOR & SURGICAL
MASK

N: This is a Respirator Rating Letter Class. It stands for “Non-Oil” meaning that if no oil-based particulates are present, then you can use the mask in the work environment. Other masks ratings are R (resistant to oil for 8 hours) and P (oil proof).

95: Masks ending in a 95, have a 95 percent efficiency. Masks ending in a 99 have a 99 percent efficiency. Masks ending in 100 are 99.97 percent efficient and that is the same as a HEPA quality filter.

.3 microns: The masks filter out contaminants like dusts, mists and fumes. The minimum size of .3 microns of particulates and large droplets won't pass through the barrier, according to the Centers for Disease Control and Prevention (CDC.)

Material: The filtration material on the mask is an electrostatic non-woven polypropylene fiber.
Valve: Some disposable N95 masks come with an optional exhalation valve. “The presence of an exhalation valve reduces exhalation resistance, which makes it easier to breathe (exhale,)” according to the CDC.

CARDINAL SL3N HEALTH PARTICULATE RESPIRATOR & SURGICAL MASK

CHANNEL BREATHABLE POLYPROPYLENE REUSABLE AND WASHABLE CLOTH MASK

Features and Benefits

- 3-Pack Of Dual-Layer Polypropylene Non-Medical Masks
- Made With Super Soft And Breathable Cotton
- EZ-Breathe Weave Stops Moisture But Allows Air Flow
- Machine Washable And Reusable (2-year average lifespan)
- Ear Loops Securely Attaches Mask
- Safely Covers Mouth and Nose
- Helps Limit The Spread of Germs
- Lightweight and Comfortable
- One Size Fits Most
- Does Not Irritate Skin

The soft elastic ear loops ensure this mask fits securely on almost everyone. And unlike other masks, these masks are machine washable and can be reused over and over again. The average lifespan of one mask is about two years.

CLINIQLANC BOND MASK

SUPERIOR PROTECTION. AWARD-WINNING DESIGN. N95+ N99+, MERV 20+ HEPA.

- N99+ U15, HEPA FILTRATION. SEE-THROUGH DESIGN. N95 FILTERED EXHAUSTS, BIOCOMPATIBLE PROPRIETARY SHAPE FIT SILICONE.
- REUSABLE HIGH GRADE MASK
- TWO LEVEL REPLACEABLE FILTERS: 1 N95 2. N99

BOND  **MASK**

Delivery 30+ Days*

BOND MASK HAS A CLEAR ANTI-FOG COVER AND A TRANSLUCENT FRAME, ALLOWING ALL MAIN FEATURES OF THE FACE TO BE VISIBLE.

BIOCOMPATIBLE, FDA CERTIFIED FOOD GRADE, OPTICAL GRADE 70A SHORE, SOFT SILICONE WITH HIGH ELASTIC STRENGTH. MIGHT SOUND LIKE A MOUTHFUL OF WORDS BUT THAT'S WHAT IT TAKES TO GET INTO A LEAF MASK.

BOND MASK

THE UNOBTRUSIVE MASKS EVEN ALLOW FOR FEATURE LIKE FACE ID TO WORK, GREATER REDUCING THE IMPACT ON DAILY LIFE.

**UNIBODY DESIGN, ULTRA SOFT TRANSPARENT
STRAPS AND DUAL EXHAUST VALVES WITH
INTEGRATED INTAKE FILTERS**

 **cliniqblanc**

THE BOND MASK DEPLOYS CUTTING EDGE AEROSPACE GRADE U15 HEPA FILTRATION. 'U' SERIES OF HEPA FILTERS IS CONSIDERED AS THE GOLD STANDARD OF HEPA FILTRATION FILTERING >99.9995% OF 0.3 MICRON PARTICLES. THE AEROSPACE GRADE FILTERING MATERIAL ACHIEVES HIGH FILTRATION WITH (PA) PRESSURE DROP OF A CONVENTIONAL N95 SURGICAL FILTER, COMBINING THIS WITH 25 PLEATS INCREASES THE EFFECTIVE FILTER AREA TO 5X THE SURFACE OF THE MASK. ALL IN ALL ALLOWING YOU TO BREATHE EFFORTLESSLY.

**SEE-THROUGH DESIGN.
BIOCOMPATIBLE

INSTITUTIONS

CLINIQLANC GLOVES

The most popular raw material used in the production of gloves is natural rubber latex, popularly known as rubber, which was known and used by the ancient Aztecs and Mayans. Gum was brought to Europe by Christopher Columbus in the 15th century.

In the mid-nineteenth century, experiments related to this material and its use in the production of gloves began. In 1834, Richard Cook in New Jersey proposed "Indian rubber" maternity gloves that were "completely impenetrable to most pathogenic viruses."

Charles Goodyear's work on the improvement of the vulcanization process in the 1840s contributed to the further development of the technology of manufacturing gloves used by surgeons and gynecologists.

In 1883, Dr. Joseph Colt Bloodgood equipped an entire team of surgeons with gloves and collected data to prove a decrease in infection among patients. However, there was still a reluctance by medical personnel to use gloves, argued for reduced sensation. These protests have waned as work on the improvement of medical gloves progressed, especially since the 1930s, when the development of latex production began.

In the 1950s and 1960s, there were revolutionary technological changes. Currently, great importance is attached to reducing the content of proteins responsible for allergies, and research is also carried out on ways to avoid allergies and irritation.

Medical gloves made of alternative raw materials such as nitrile, neoprene, polyisoprene and blends of synthetic polymers are launched.

Despite the multitude of raw materials used in the production of medical gloves, latex, biodegradable and barrier gloves against viruses and bacteria are still the most popular medical device and personal protective equipment.

A pair of blue nitrile gloves is shown resting on a dark, textured surface. The gloves are slightly wrinkled and appear to be made of a smooth, synthetic material. The background is dark and out of focus.

SCIENCE IN MOTION

COMPREHENSIVE RANGE OF CLINIQLANC GLOVES AND HAND PROTECTION TO KEEP YOU SAFE LUCENT, RADIANT & FORGENIT.

Disposable Gloves Are One Of The Most Widely Used And Most Frequently Used Protective Products. Bacteria, Mycobacteria, Fungi, Microbes And Viruses Can Easily Be Transferred From Touched Objects To The Hands. Compliance With The Basic Rules Of Hand Hygiene Together With The Use Of Gloves Appropriately Selected For The Type Of Hazard Protects The User, Patient And The Object They Touch.

Diagnostic And Protective Gloves Are Both A Medical Device And A Personal Protective Equipment. They Are Designed To Protect Our Hands, Being The First Obstacle To The Spread Of Bacteria, Viruses And Other Contaminants.

The Quality Of Gloves And Their Features Are Defined By Strict And Detailed Guidelines Included In The Relevant Directives And Harmonized Standards.

Properties:

- Evenly Rolled Cuff Edge For Easy Putting On Of Gloves,
- Universal Shape,
- Wide Range Of Sizes: XS (5-6); S (6-7); M (7-8); L (8-9); XL (9-10),
- In Accordance With The Requirements Of The Medical Device Directive 93/42 / EEC And Regulation (EU) 2016/425 (In Accordance With Article 46 Of Regulation (EU) 2016/425: Council Directive 89/686 / EEC Has Expired With Effect From April 21, 2018. References To The Repealed Directive Are Construed As References To The Regulation According To The Correlation Table In Annex X).

CLINIQLANC FORGENIT GLOVES AND HAND PROTECTION TO KEEP YOU SAFE.

LATEX & POWDER FREE / AMBIDEXTROUS
NON-STERILE / MICRO FINGER TEXTURE

CAUTION: Components used in making nitrile gloves may cause allergic reactions in some people. Do not expose this product to any person known or suspected to be sensitive nitrile manufacturing components before consultation with a physician. Follow your institution's policies for use. For single use only.

STORAGE: Store at a temperature less than 40 °C (104 °F). Open box should be shielded from exposure to direct sunlight, intense artificial light, x-ray machines, and other sources of ozone.

HARSH CHEMICALS: Although good quality nitrile gloves provide an excellent biological barrier, they are not intended for applications involving prolonged, direct exposure to harsh chemicals, where heavy duty or industrial gloves are required.

CLINIQLANC CSK

1. CREW SAFETY PROTECTION PACK

2. PUBLIC SAFETY PACK

Cliniqblanc offers two versions of the safety packs for air travel: one for passengers and one for the flight crew. The passenger version is designed for single use and contains latex-free gloves, a safety mask and hand wipes. Kits for crews and airline employees are available for single or longer-term use, with an option for a reusable version that has a mask with interchangeable filters, reusable safety glasses and hand wipes.

Both versions of the safety kits come in resealable bags for easy transportation and are available for airline, cargo and business aviation aircraft. The kits' packaging can also be branded by the airline or other host of industries.

Cliniqblanc Safety Packs are part of a strategic initiative among Cliniqblanc's businesses to Come together to quickly develop solutions that are helping important sectors of the global economy recover.

In addition

From the check-in line to the cockpit, Cliniqblanc's experience in air travel, Spanning components, airport management systems, personal protective wear and building management technologies, makes it uniquely positioned to craft innovative solutions for the individual needs and challenges of airlines, airports and aircraft operators worldwide.

In addition to air travel, across Cliniqblanc, the company offers similar products for buildings, workers, manufacturing, entertainment, health care and supply-chain solutions.

CLINIQLANC **SAFETY PACK** – CERTIFIED MASK, NITRILE GLOVES AND SANITIZING WIPES.

Cliniqblanc is helping provide a safer and healthier travel experience with new Cliniqblanc Safety Packs designed to better protect airline passengers and crew while flying.

Beyond use for air travel, the Cliniqblanc Safety Packs will also be available for use in office buildings, warehouses, retail stores, sports arenas, schools and other public spaces.

The kit come in a sealed packets containing gloves, masks and hand wipes — are a part of Cliniqblanc's comprehensive efforts to help protect people as they return to public spaces and workplaces.

THANK YOU FOR REVIEW. CONTACT US.

SCIENCE IN MOTION

Medical products is an ever-changing science. As new research and clinical experience broaden our knowledge, changes in product development and delivery are required. Cliniqlblanc Healthcare Network and the Cliniqlblanc designated online providers have checked with sources believed to be reliable in their efforts to provide information that is complete and generally in accord with the standards accepted at the time of publication. However, in view of the possibility of human error or changes in medical sciences, neither Cliniqlblanc Healthcare Network nor the Cliniqlblanc designated online providers warrants that the information contained in the Cliniqlblanc Healthcare Network and the Cliniqlblanc products is in every respect accurate or complete, and they are not responsible for any errors or omissions or the results obtained from the use of such information. Users are encouraged to confirm the information contained in Cliniqlblanc Healthcare Network and the Cliniqlblanc products with other sources. For example, and in particular, users are advised to check the product information sheet included in the package of each drug they plan to administer to be certain that the information contained in Cliniqlblanc Healthcare Network and the Cliniqlblanc products is accurate and that changes have not been made in the recommended dose or in the contraindications for administration. This recommendation is particularly important in connection with new or infrequently used products. Neither Cliniqlblanc Healthcare Network and the Cliniqlblanc providers shall be liable to the user or to anyone else for any inaccuracy, delay, interruption in service, error or omission, regardless of cause, or for any damages resulting therefrom.
