

GAINFY TOKEN OFFERING

BRINGING TRUST TO HEALTHCARE WITH BLOCKCHAIN, AI AND IOT

Dear fellows!

Bitcoiners, crypto-investors, blockchain enthusiasts, and professionals from all walks of life! Gainfy has launched Token Offering to build a new era of healthcare.

We have decided to distribute 40% of Gain tokens to the public.

There are reasons for this decision. We need funds to establish the Gainfy platform and update it with the new features in the future. We need financial support to develop our platform and go after large employers and governments as partners. We have already started working the process of collaboration and partnership structuring with several countries. We will be releasing our PR news upon signing MOUs. The brief description what we are doing is available: gainfy.com; we are planning to launch our first phase products in 2019.

Your trust in Gainfy would be our motivation to improve our products. You should be the one to decide whether it worth being part of Gainfy Fundraising Offering.

Our team has been working hard to make Gainfy a reliable company, providing practical solutions to the healthcare problems now we are facing. We want to use AI and blockchain technology to help employers and consumers save on their medical cost, and to give consumers full ownership of their medical records, and financial incentives for sharing data and staying healthy.

While our decision to issue Security tokens pursuing Rule 506 (C) imposes some restriction and limitation, we believe we have found the best solution for legal compliance to protect the company and investors in today's US regulatory environment which is still developing. Our Gain tokens serve the needs of beginners and professional investors. We are now ready to take Gainfy to the next level.

Blockchain could change the healthcare world. We are happy to be able to be a part of it and welcome more people joining us!

Sincerely,
Victoria Saucier,
CEO, Gainfy
